DXpedition News

Russian Oblasts Igor UT4UX, Yerry UT4UZ, and RT4UA plan a DXpedition to **Oblast 042 RJ7R** at the end of June, into early July. They intend to be on all bands 160-10 meters, SSB and CW. Watch for them around 14225 kHz and above 21300 kHz. QSL to their home callsigns. UB5JRR and others will go to **Oblast 003 UD6K** for one week in early July, signing /RD2, /RD3, etc. At the end of July, they'll operate from **Oblast 100 UA9Z**, to mid-August. They've asked for a special prefix, such as UU9. Finally, 26 operators from the UZ4FWD radio club will be on from **Oblast 055 UI8U** and **Oblast 045 UH8W** in June.

Southern Sudan - ST0 John **PA3CXC** came on from Southern Sudan adding **/ST0** to his call at the end of May, for a few days. He was trying to lay the groundwork for a longer DXpedition beginning in July. QSL his home call.

Edited by Chod Harris VP2ML

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

Marion Island - ZS8 Peter **ZS8MI** has been quite active on SSB, especially 12-1500Z. Favorite spots seem to be 14222, 14270 +/-, 14175-180, and 14145 kHz. He's also been on 28800 kHz. He usually listens up about 10 kHz. Check the long path; he's often stronger that direction. He will give CW QSOs on SSB frequencies, but he's very slow. QSL ZS6PT.

Chad - TT8 **TT8CW** continues to operate primarily in a rather poorly-run list operation on 14250 kHz at 0000Z. His signal out of the vertical is weak. He plans to put up a dipole and get on CW this month. QSL F2CW.

Glorioso - FR/G Yoland **FR5AI/G** wraps up his month-long DXpedition June 18. Stateside DXers have had the best luck on 14010 kHz at 12-1300Z, on the long path. Other reports have been scarce. His T7 note is very distinctive. QSL home callsign.

June 9, 1989 Issue 491

Reserve Your Island - CQWW CW

- Paul K1XM and Charlotte KQ1F will operate the CQWW CW contest from Belau KC6 (Western Carolines). They may have room for another operator/scuba diver.
- John K4BAI returns to Barbados as **8P9HT** for the CQWW CW test. He'll be there Nov. 22-29, concentrating on 1832, 3525, 7025, 10118, 14025, 18070, 21025, 24898, and 28025 kHz. QSL home call.
- Members of the Southwest Ohio DX Association return to St. Lucia in the CQWW CW test, running **J6DX** in a multi-multi operation. They'll be there Nov. 21-30, working SSB, RTTY, the Novice bands, and maybe 6 meters, outside the test. They can handle a few more operators; contact W8OK or N9AG.
- Chuck Wood NF6S and others will put **VP2MU** on in CQWW CW, from The Last Resort in Montserrat.

Shortly Noted

- UB5JRR will be in North Korea P5 July 1-7, and will seek amateur radio permission.
- Peter **7P8EL** has started a two-year operation from Lesotho. He prefers SSB but will make a CW contact on request. Try 28488 kHz at 1600Z. QSL Box 521, Maseru.
- **TA2BK** is very active. Try 14030 or 14207 kHz at 0230Z, 21026 or 21290 kHz at 00-0400Z, and at 1500 and 2100Z, as well as other times. QSL DU0DJ.
- **XF4F**, presumably the Revillagigedo commander trained by the XF4L operators, is often on weekends. Try 14300 kHz at 1600Z Saturday, or 1500Z on Sunday.
- Newfoundland VO1 and Labrador VO2 hams are using VO4 and VO5 prefixes in honor of 40 years of provincehood.
- The DX-News reports that Andy Lingham **9M8PV** is on 3795 or 7040 kHz at 2200Z, 14165 at 1100Z, 21205 at 0500Z weekends, 21330 at 1500Z, and 28550 kHz at 1400Z. QSL to ENG/2 MLNG, Box 89, Bintulu, Sarawak, East Malaysia.
- TU4BR is now on as **EL2FO**. QSL KN4F.
- Regulars (callsign, frequency or band, UTC): **3B8CF** 14030 or 21030 0330Z, 1400Z; **FR4FD** 14005 0400Z; **TA4A** 20M CW 0100Z; **3B8CA** 14195 1345Z long path; **3B9FR** 14195 1100Z long path; **3D2AG** 14165 1130Z; **3DA0AH** 14220 1345Z long path; **KC6JC** 14208 1130Z; **TU2JL** 20M SSB 0430Z; **SU1EE** 21025 0045Z; **SU1EK** 21030 0100Z; **T5MF** 15M SSB 1800Z; **TR8RLA** 15M SSB 2100Z; **6W6JX** 10M CW 1330Z.
- Islands On The Air: **WA4DAN** will be on from the North Carolina Islands (NA-112) June 10, on 14260, 21260, and 28560 kHz. QSL home call. **TV6GLE** will be operated by several French DXers June 8-13 from Glenen Island (EU-94). UR2RE and other members of the **UR1RWH** club will be on from Ruhnu Island (EU-34) June 16-23. IK8AUG and I8KNT will sign **/IE9** from Ustica Island (EU-51) June 15-21.
- RTTY reports: **9X5AA** now has RTTY capability. Try weekdays after 1900Z, on 15 and 20 meters. **SU1EE** is often on 14080 or 21090 kHz at 02-0300Z. **TZ6MG** 14091 2250Z; **AH2CE** 21092 2300Z; **V85GA** 21088 0130Z; **9M6HF** 21084 0200Z; **6W6JX** 14078 1030Z; **VQ9ZZ** 14080 1420Z; **TA2BE** 14074 ARQ 2145Z; **A35SA** 21080 0020Z; **CO2BB** 21091 0200Z.

Propagation Watch

Solar activity picked up in early June, relieving fears that Sunspot Cycle 22 might peak prematurely. The number of sunspots has increased significantly, after declining for several months. And some of the new sunspot regions are larger, more complex regions, and are thus more likely to boost solar flux (and create more flares.)

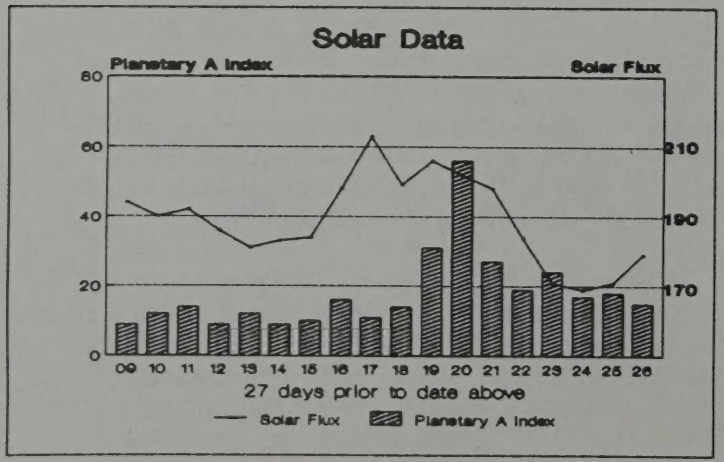
The propagation forecast for the next few weeks, based on the last solar revolution, is for excellent conditions on the higher bands through June 18, followed by a week of possibly degraded conditions. The period of June 9-18 is one solar revolution after the superb band conditions of mid-May.

If this comes to pass, look for worldwide openings on 15 meters, lasting far into the night. If 15 isn't open, 20 meters will most likely be. A prolonged period of very low geomagnetic activity, as we enjoyed in May, means excellent polar-path openings, and good signals on the long path. Check 20 and 30 meters in the early morning local time, and 15 and even 10 meters in late evening for long-path signals.

The seasonally low maximum usable frequency (MUF) around the summer solstice will tend to put a damper on 10 and 6 meters, but these bands will enjoy some good E-skip openings, and some north-south propagation.

Although high static levels in the northern hemisphere make low-band DXing difficult at this time of year, another prolonged stretch of low geomagnetic activity will produce some openings on 40 and 80 meters.

The kicker is that the sun won't necessarily repeat its May performance. At this stage in the sunspot cycle, sunspot regions can build rapidly, and fade away, in a matter of a few days, not enough time to survive the trip around the back side of the sun. So keep checking WWV at 18 minutes after the hour for the latest news.



QSL Information

▪ Ross Forbes WB6GFJ reports that about 20,000 **3D2XX** QSLs have been mailed (and as of June 1 are accepted by the ARRL's DXCC desk for Rotuma credit.) A few hundred QSOs that were not found in the logs despite extensive research will get one more chance before being returned. Many of these were on CW, and may have been confused with the 3D2VV who was on at the same time. The 20,000 cards mailed exhausted the second printing of QSLs, and more cards are due back from the printer later this month.

▪ In other QSL news, HA0DU reports that the **3W8CW** and **3W8DX** cards are being filled out at the rate of about 3,000 per week, and hope to be finished soon. [I don't have mine yet. -ed.] Also, PY7ZZ says the **ZZ0F** cards were shipped from Japan in April by sea mail. Please don't send a second card.

▪ KC4MJ assumed QSL duties for **4X1AD** effective June 1. Use the 1989 *Callbook* address only. Neil will also be able to confirm contacts with Morel's previous call of **4X6MQ**, will some delay.

▪ WA4BCQ is QSL manager for **VS6DX** and **XX9DX**. Use a large envelope for the over-sized QSLs.

▪ Nick Lay G0ACJ, who operated **VP8BRE** and **ZC4NL**, says the address i the 1989 *Callbook* is wrong. QSL direct to 1 The Spinnet, Woodlands Vales, Scarborough YO12 5HQ, England.

▪ **6W6JX** says that anyone who has problems obtaining his QSL from F6FNU can QSL direct: Jean-Louis Pipien, Salins du Sine Saloum, BP 200, Kaolack, Senegal.

▪ Likewise Ken Ramirez **KH2F** says he can confirm his operations, including **VQ9KR** and **NP4JV/KH2** direct: Lot 24, Northwoods Manor, Route 26, Rome NY 13440.

▪ Ian **ZD8IAN** says that G4ZAO is no longer his QSL manager, since last October. QSL to Ian's home call of G4KJD via the RSGB bureau.

▪ Wayne Yoshida KH6WZ says he handles cards for the Barbados Boy Scout station **8P6BBS** for 1988 CQWW SSB test **only**. He cannot confirm other QSOs.

▪ Some pirates: **3A0A** is reported as a pirate by some European DXers. **A51PN** says he has not been on the air since 1982; recent QSOs are bogus. And cards for the **XX9GP** who asked for cards via the KL7 bureau have been returned from that bureau marked "unknown."

▪ And to clear up the confusion about the QSLs for **CN8FC**: that callsign has been reissued. The currently active **CN8FC** is Steve Hawley WA4UAZ at the American Embassy in Rabat. He is legit, and QSLs via WA4QMQ. The former holder of the CN8FC call, Mr. Abercrombie, is getting cards for Steve's QSOs, and is returning them.

▪ Some QSL routes: **PA0GAM/ST2** QSLs via PA0GIN, G. Heemstra, Noorderkroonstr. 16, 9742 XD Groningen, The Netherlands.

KL7JC can be confirmed via K8BTH.

QSLs for the **VP5P** operation in CQ WPX CW can be sent to WN5A.

Stateside DXers wanting a card from **VP2M/F2JD** can get one from KC8JH.

Also for stateside **only**, QSL UZ1OWZ via Greg Lee, Route 2, Box 309-1A, Crown City, OH 45623.

QSL the **UA4WGR/UW2F** operating in CQ WPX CW direct to Alexes Djupin, 58-18 Bummashevskaja Str., Izhevsk 426 050, USSR.
